

Stove and microwave come out.
Cooktop will go where stove currently is. Dead space in corner to the right of stove and under coffee pot, would like to have slide out shelves that fill that space.

Would like to remove the current pantry to the right of the fridge and put in two cabinet pantries that pull out.

Dishwasher and sink will be in the same place. New sink, farm style(?), an in-cabinet drain.

Wine cooler will be relocated, it is not an in-cabinet style.

This wall, would like lower and upper cabinets. On the right side will be a double oven. Microwave will attach to wall centered between ovens and left wall.

Would like island as a part of the kitchen still. Things to consider: cabinet for stool for shorter members of the family. Mixer cabinet, we have a heavy mixer and would like a lower cabinet to house it with a shelf that lifts up with mixer on it. Cookie sheet, cupcake tray, cutting board cabinet.
